PROFESSIONAL SUMMARY

Creative and analytical engineer with knowledge of various programming languages seeking a challenging and dynamic role in a growth-oriented organization. I aim to advance and expand my skill set while contributing to the development of the organization.

PROJECTS

Handyman job seeking system

Mini Project (2022-2023)

The Handyman Job seeking System is a database-based project created using HTML, CSS, and Django. We have noticed a decline in the availability of handymen due to joblessness, and to address this problem, we proposed this system. The Handyman Job seeking System provides a platform for handymen to find jobs based on their specialization more easily, thereby benefiting the society.

Smile To Capture

Python Project (2022-2023)

Smile to Capture is a Python project designed to capture an image of a person when the system detects a smile. This is achieved with the help of OpenCV, a popular computer vision library in Python. The project was created as an exercise to gain a better understanding of the OpenCV module in Python.

Xpress

Main Project (2023-Present)

Xpress is a chat application that was built using the Flutter framework. Unlike other chat apps, Xpress has an innovative feature that detects the user's facial expressions and automatically appends an appropriate emoji to each message. This unique feature is designed to enhance emotional connections between users on a simple chat platform.

EDUCATION

BTECH, Computer Science and Engineering

University College Of Engineering (2020-2024) | CGPA: 7.41

HIGHE SECONDARY

Vmhss (2017-2019) | SCORE: 76.5%
